

## Technical Data Sheet

Brand: Sanitech  
Model: Alco  
Size: 140 x 70 cm  
Height: 37.5 cm

### PRODUCT DATA

Material: Cast Acrylic  
Finish: White  
Product Type: Inset Bath

### TECHNICAL INFORMATION

- Sanitec manufacture acrylic bathtubs which conform to international standards using ISO grade acrylic sheet. The unique ultra gloss sanitary ware grade acrylic
- sheet conforms to and meets British standards BS-7015. Bathtub conforms to BS-4305. Acrylic bathtubs can withstand hot water temperature of 100 degree
- centigrade for a very short time only. But it is not advised to do so, because it will damage the texture and glazing in the long run. However bathtubs can withstand temperature of up to 55°centigrade without any damage provided hot and cold water are mixed through the mixer and then discharged in to the bathtub.

- ☐ Acrylic sheet thickness is 3mm Fibre glass coating is not less than 3mm
- ☐ Bathtubs are provided with one uniform thickness wooden support underneath
- ☐ for added strength and further reinforced and water proofed with fibre and resin mixture. Total thickness of bathtub is, on an average 6mm excluding the thickness of wooden support. All bathtubs are provide with protective film on the
- ☐ exposed side of the acrylic sheet, which should be only removed only after completing all work in the bathroom.
- ☐
